DETAILED ACTION

The response filed **March 03, 2006** presents remarks and arguments to the office action mailed **October 10, 2005**. Applicants' request for reconsideration of the rejection of claims in the last office action has been considered.

Status of Claims

Claims 1-26 are pending.

Response to Arguments

Maintained Claim Rejections - 35 USC § 112

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicant traverses the rejection of claims 1-4 are not indefinite because of the terms used unsubstituted and substituted are common terms of art.

In response, although these are common terms used, surely not all possible unsubstituted or substituted variables of the term are used and indeed not all the possible various compounds are made. Absent showing that all the possible variables of the unsubstituted and or substituted forms where made, the rejection is maintained.

Applicant's arguments regarding rejections of claims 1-4 under 112-second have been fully considered but they are not persuasive because of the reasons stated above, therefore the rejection is maintained.

Maintained Double Patenting

Art Unit: 1614

Applicant will address this issue when claims are allowed, therefore the rejection is maintained as no traversal was made because the rejection is to a provisional US application.

Claim Rejections - 35 USC § 102

Claims 1-2, 4-8 and 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Sneddon et al. WO 01/87849.

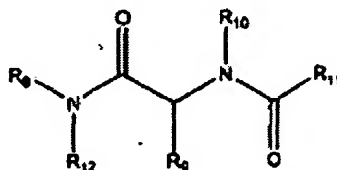

Applicant's arguments with respect to claims 1-2, 4-8 and 12-15 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1-26 are rejected under 35 U.S.C. 102(a) as being anticipated by Sneddon et al. WO 01/87849.

Sneddon discloses current claims 1 and 2, a method of inhibiting tissue transplant, as graft versus host disease, (see page 14, line 30), administering the

compound of formula I

wherein the substituents

are the same as that of the claimed subject matter. See table below

Reference	instant	Data set
R ₁₁	R ₃	Substituted/unsubstituted

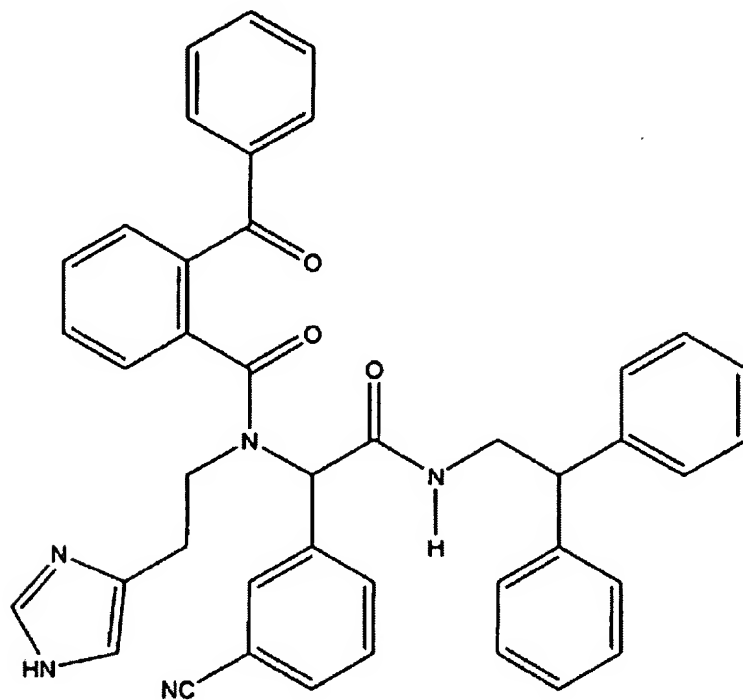

Art Unit: 1614

		alkyl
R ₁₀	R ₂	substituted arakyl
R ₁	R ₉	substituted arakyl
R ₁₃	R ₄	substituted alkyl
R ₈	H	H

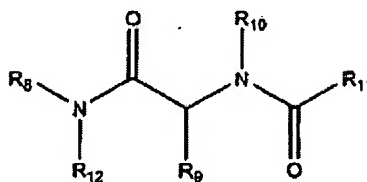

Sneddon discloses current claims 4-8, wherein, R₄ = R₁₂ is a substituted aryl group at page 82, line 7, and as in current claim 5 wherein R₄ is a substituted phenyl group at page 97 line 2, and a benzyl as in current claim 6. Sneddon also discloses current claims 7 and 8, wherein R₁ = R₉ is C₁-C₄ is either a substituted aryl/alkyl group (see page 82 line 10) and claim 9 a substituted aryl group, and an optionally substituted phenyl group as in claim 10. The reference discloses (see page, 52 table 1 compound 1, subsequently the reference anticipates claims 11-23.

Art Unit: 1614

Sneddon also discloses administering the compound of current claims 24-25

(see page 87) to a patient with graft versus host disease (see page 14 line 30). With

regard to current claim 26 (see page 96)

where the

substituents of R for example R_{13} in the instant claim is represented by R_{11} are the

same-substituted alkyl, R_{12} is R_{10} in the cited reference is alkyl, R_{11} is R_9 etc.

No claim is allowed.
